SynchGo is an urban electric bike experience. New to the UK we're offering a range of revolutionary electric bikes for those that want a unique urban street look. Fast, efficient and most importantly stylish, our range of electric bikes can be customised for your own bespoke look.

Why we started Synch

Our mission is to make a positive impact on people and our planet using incredible technology. Electric bikes bring countless benefits and we intend to raise awareness of this, encouraging people to become more active and mobile whilst travelling in more environmentally friendly way.

Why Now?

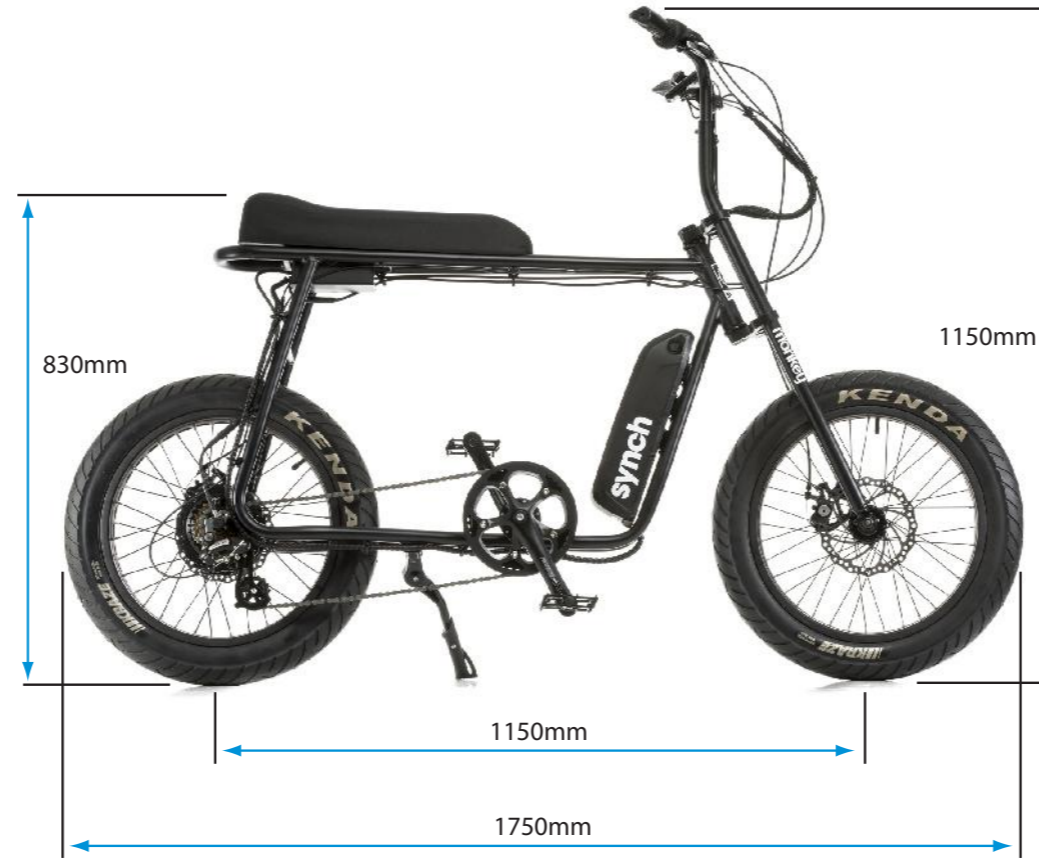

We are in the midst of an urban migration. As a result we are experiencing unprecedented levels of traffic congestion and pollution. The eBike is the obvious answer to solving these problems. It enables us to get around our overcrowded cities with ease, without the limitations of normal cycling and eliminating the misery of sitting for hours in traffic.

In these stressful times the eBike gives us a wonderful opportunity to escape from the busy world we live in. It is so easy to pedal off deep into the countryside, to reconnect with nature and explore the world with the knowledge that you will be able to cope with any difficulties along the way whilst improving your health.

Our Ethos

As an independent Bournemouth born business we are not "just another bike shop"! We are a tight knit group of enthusiasts and professionals who are committed to bringing you the best in eBike technology.

We are a new category of commuter. We welcome weekenders, explorers, tube takers, city-slickers, eco-warriors, gas guzzlers and anyone else who cares to move quickly, silently and serenely through the city. Come on, plug in, gear up and head into the distance.....

The Synch Super Monkey is assembled in the UK at our unit in Poole.
